Education

Carleton University

Bachelor of Computer Science Honours (B.C.S) - AI and Machine Learning, Co-op Option

GPA: 9.41/12.0 (B+) | Available for 4 months beginning September 2026

Awards: Carleton President's Scholarship

Expected Graduation Date: 2029

Ottawa, ON

Skills

Languages: Python (Expert), Java (Expert), JavaScript (Expert), HTML/CSS (Proficient), SQL

Developer Tools: Azure, AWS, Git, Vercel, Visual Studio, IntelliJ

Libraries/Frameworks: Pandas, Postgres, Spring Boot, React, Vite, Node.js, Next.js

Soft Skills: Leadership, Communication, Collaboration, Problem Solving, Time Management

Experience

Application Programmer Co-Op | Python, SQL, AWS, Azure

May 2026 – Present

Government of Ontario

Toronto, ON

- Developing data pipelines using **Python** scripts and Informatica ETL services, leveraging C-based utilities and libraries to optimize large scale data processing while implementing cloud-based solutions within **Microsoft Azure** and **AWS** environments

Founding Software Developer | Python, Java, HTML, PostgreSQL, REST APIs, JavaScript

Aug 2025 – Present

Game of Streaks – My Picks

Toronto, ON

- Developed a live sports prediction platform using **Python, Java and Next.JS TypeScript** codebase aimed at promoting responsible play and reducing gambling risks across Canada
- Processed real-time sports by validating sample API integrations using unit-level test logic, REST APIs and Auth0 based authentication, achieving a **40%** increase in speed and enabling secure concurrent data operations for **1k+** users
- Reduced live score latency to under **3 minutes** through efficient API fetching, **data chunking** and PostgreSQL database optimization, managing data using **GitHub Actions** and **Google Cloud Platform**
- Monitored and analyzed web traffic from **180k+** page views, **31k+** visitors across **75+** countries and **7** operating systems, **documenting** findings in clear **technical reports** with Excel and leading meetings to inform data-driven growth strategies

Projects

Embedded Health Monitor | Python, C, C++, Linux

Jan 2026

Personal Project

Ottawa, ON

- Conceptualized and developed an embedded Linux based health monitoring system using C++, modeling multiple processors communicating over **UDP/IP** sockets to synchronize high frequency data across vehicle microservices
- Programmed **unit testing** and validation in real time, in a heartbeat monitoring system using sockets in **4** different processes
- Automated a **Python** script to emulate real network management scenarios, including service supervision and **fault isolation**

FloodWatch – ARCGIS Based Website | JavaScript, CSS, HTML, React, Vite, Node.js, Git

Oct 2024

Nasa Space Apps

Ottawa, ON

- Established a program using **ARCGIS** data to analyze the effects of flooding in Canada and the consequences over time, resulting in a **25%** improvement in data accuracy and geographical insights
- Constructed a responsive website featuring **3 tabbed pages**, incorporating images and a map linking users to ARCGIS mapping
- Achieved a **certificate** of outstanding participation and efforts to address challenges faced on Earth and in space

SafeSpace – NLP powered Web App | Python, XML, JavaScript, React, Spotify API, Wit.ai

Sept 2024

Hack the Hill

Ottawa, ON

- Designed an innovative web application using **Python** to assist users, taking all their favourite comfort activities to one platform
- Engineered and trained **Wit.ai** NLP model with **33** diverse utterances to enhance NLU and user interaction accuracy by **80%**
- Integrated **Spotify API** into application to enable seamless music retrieval and improve user functionality with **XML** files

Extra-Curricular Activities

Software Team Representative

Nov 2024 – Apr 2025

Carleton Planetary Robotics Team

Ottawa, ON

- Assembled and tested **LED circuits**, achieving a **25%** improvement in feedback clarity and enhancing lighting patterns for system indicators
- Performed **debugging** and **optimization** in Linux-based environments to enhance performance and reliability
- Collaborated with Mechanical and Electrical team members to implement firmware updates and troubleshoot system-level issues
